COMMERCIAL SERIES

For pressurized systems only, this check valve offers the same feature that the Shaw Development Non-Pressurized Refueling Systems in that it will allow a receiver to be changed in the field without emptying the fuel tank, and will help prevent the unauthorized removal of fuel thru the receiver.

The Shaw Commercial Series Products are custom designed to fit your specific needs.

Designed primarily for off-road construction equipment, agricultural equipment and trucking, Shaw can custom engineer that particular part that you can't seem to find anywhere else.
